

In Practice

GP IUD Insertion Training

Save time and money by training for IUD Insertion in your own Practice with your own patients under the guidance of a clinical expert from Iris Education

Training Information

This training is designed for GPs who already have a special interest and competence in Women's Health, Contraception and LARC. The Iris Education model of IUD training involves a theoretical component provided at the outset of training to the trainee (by mail and phone discussion) followed by one on one training in the practical aspects of IUD insertion in the GP's own clinical setting.

The training is conducted over two 3-4 hour sessions or 1 full day of training. Once completed, the GP is awarded the "Certificate of Completion of IUD Insertion Training" to provide to their Medical Indemnifier when they commence their IUD practice. This training is accredited with RACGP and ACRRM. It attracts 40 CPD Accredited Activity points, or PDP units: 11 Educational activity, 1 Performance review. Training is able to be conducted anywhere in Qld, dependent on the training practice covering the cost of travel and accommodation for the Iris Education trainer.

Training Requirements

Participation in this training requires the GP learner to recruit up to 8 of their own patients who are requesting an IUD. The training experience involves the GP inserting IUDs for these patients in their own clinical setting under the one-on-one supervision of the Iris Education IUD Trainer. The GP's nurse assistant's involvement in this training is critical.

Training Benefits

As well as preparing you to better serve your community, this training provides comprehensive resources and access to follow up from clinical experts in the field. Training In-Practice saves you time and money.

Training Cost

The fee to cover everything described on the right is **\$2500**. Travel costs of the trainer are to be met by the Practice or trainee. This includes mileage above 40km from Brisbane CBD, and if needed, flights and accommodation. Iris Education will charge \$50.00 per hour of travel. Contact Iris Education for an exact costing at your location.

When considering the cost of training, take into account that 8 IUD insertions performed during training recoup \$1010.00 in Medicare rebates.

A previous or current IUD inserter looking for a refresher? Contact us about our \$1500 short program

Step One

Make contact through the Iris Education [Website](#)

Step Two

Receive an email response from Iris Education discussing our training model.

Step Three

Receive a call from Iris Education to discuss training, pay 50% of fee, set a date.

Step Four

Receive via mail, the Self-directed Learning package.

Step Five

Recruit the required number of patients.

Step Six

Phone discussion with Iris Education trainer regarding your anticipated clients' clinical details.

Step Seven

Undertake the training in your own Practice in one or two sessions with Iris Education trainer.

Step Eight

Participate in post training activity and discuss outcomes by phone with Iris Education trainer.

Step Nine

Pay the remaining 50% fee.

Step Ten

Receive CPD points, and certificate of completion. Start providing IUD insertion services to your community.
